Fast turn around and an absolutely beautiful tone the first time. Juca has a mastery of all the subtleties of sound modeling. Better than I could ever do myself. When I consider all of the effort and money I put into my playing, the price is a bargain. Will definitely use this great new service again! [See less](#)

"What was it like working with this Seller?" - Absolutely awesome! Quality and communication could not have been better. As a beginner, my ability to work out how certain guitar tones are created is, let's say, severely limited. This was probably something super simple for a pro like Juca, but this helped me out tremendously! [See less](#)

This gentleman was a pleasure to work with. I'm a novice using the Katana and Tone Studio and he was very patient with me, taking the time to describe how to not only download the files but to install them as well. All I can say is Mr Juca went way over and above what I could have expected from him. Hats off to you sir and I look forward to wanting a custom patch again. I know that I will because the patch I initially wanted was from a particular Dead song and he hit it right on. It aint easy to get Jerry's tone. Thank you again! [See less](#)
