

Boss Katana Compatibility Document

The Boss Katana MKI patches are compatible with both the MKII and the new GEN 3.

There's no backwards compatibility.

Same applies for the Boss Katana Artist which is compatible with the Artist MKII and Artist GEN 3.

However, there's a software called: **Fx FloorBoard** that has no affiliation with Boss, but is capable of reverting this incompatibility between Katanas.

Fx Floorboard is also capable of presenting you a new layout that might suite your needs in a more manageable way.

Here are some screenshots of the Fx FloorBoard:

You can download it here: <https://sourceforge.net/projects/fxfloorboard/>
