"Juca's service was phenomenal! He created a patch that allows my Sire H7 to sing like a Gibson ES-335 to duplicate an iconic Larry Carlton solo. Absolutely nailed it. He also walked me through and resolved guitar system issues I was having that had nothing to do with the patch. Excellent communication... See more"

"I wasn't expecting much as most of the heavy patches for the Katana fall flat. Juca hooked me up with the fuzz patches that will be the core sounds for my doom project. Hats off my friend you nailed Electric Wizard and Windhand for me!"

"I'm happy with the very good results regarding the Patch I asked for - which was not an easy one to replicate I'm sure. So I would recommend Juca Nery for his work, and considering there are so many variables in this type of product I think he did a great job and gave me as close as possible to what I wanted."

"Wow is all I can say, im blown away by his attention to tonal detail its astonishing and sounds just like the albums guitar tones. Put it this way it sounded so good I ordered another premium patch set 5 seconds after receiving my first order. He's fast, communicates, and his attention to tonal detail is AMAZING. DO NOT HESITATE TO ORDER PATCHES FROM HIM."
